

## REMARKS

Applicants hereby respond to the Examiner's invitation stated on page 2 of the Notice Allowability dated February 17, 2005 to amend the claims in response to the Examiner's suggested amendment. Applicants have reconsidered the suggested amendment and have formulated a new amendment that gives the Applicants' claims their broadest possible scope while responding to the Examiner's concerns. In particular, Applicants have amended the claims by substituting "processor-implemented" for "computer-implemented" in the preambles of claims 1, 12 and 20.

The amendment adds no new matter and is fully supported by the specification as filed (*See*, for example, Application, Page 37, lines 7 – 24) and most particularly by: "Also, with lower computational time demands, simpler and cheaper processors can be utilized with the present invention but still achieving reasonable processing speed" (Application, Page 37, lines 21 – 24)(emphasis added).

Commissioner for Patents  
Application Serial No. 10/038,846  
March 22, 2005  
Page 18

The Applicants respectfully request that the amendment be entered and that the claims reflect the amendment when the application issues as a patent.

Respectfully submitted,

March 22, 2005
